Uygulamalar

Q75027 Serisi pompalar, katı parçacık içermeyen temiz veya çok az kirli sular için uygundur. Pompanın; motor ve fan kısımları arasında bulunan çift taraflı mekanik salmastra ve bu mekanik salmastrayı tam soğutma sağlayan yapısı sayesinde pompa motorunun suya karşı dayanımı yüksek ve güvenilirdir. Su altındaki alanların (odalar, bodrumlar, garajlar) boşaltılması, evdeki suların tahliyesi (bulaşık makinelerinden, çamaşır makinelerinden) ve temiz veya çok az kirli drenaj sistemlerinin boşaltılması gibi alanlarda kullanımı uygundur.

Application

The Q75027 series is suitable for use with clear water that does not contain abrasive particles. Because of the design solutions that have been adopted, such as the complete cooling of the motor and the shaft with double seal, these pumps are easy to use and reliable. They are suitable for use in applications such as draining small flooded areas (rooms, cellars, garages) in the event of an emergency, for the disposal of waste water in the home (from dishwashers, washing machines) and for emptying drainage traps.
